The professional approach toward business

Road transportation

Road freight has several advantages relative to other modes of transportation: mobility, speed of delivery, versatility, predictability, quality of delivery. Our company provides services for road transport in the Russian Federation and international traffic: Europe, China, CIS countries — using tilt and refrigerated transport, container ships, low loaders, tanks.

Rail transportation

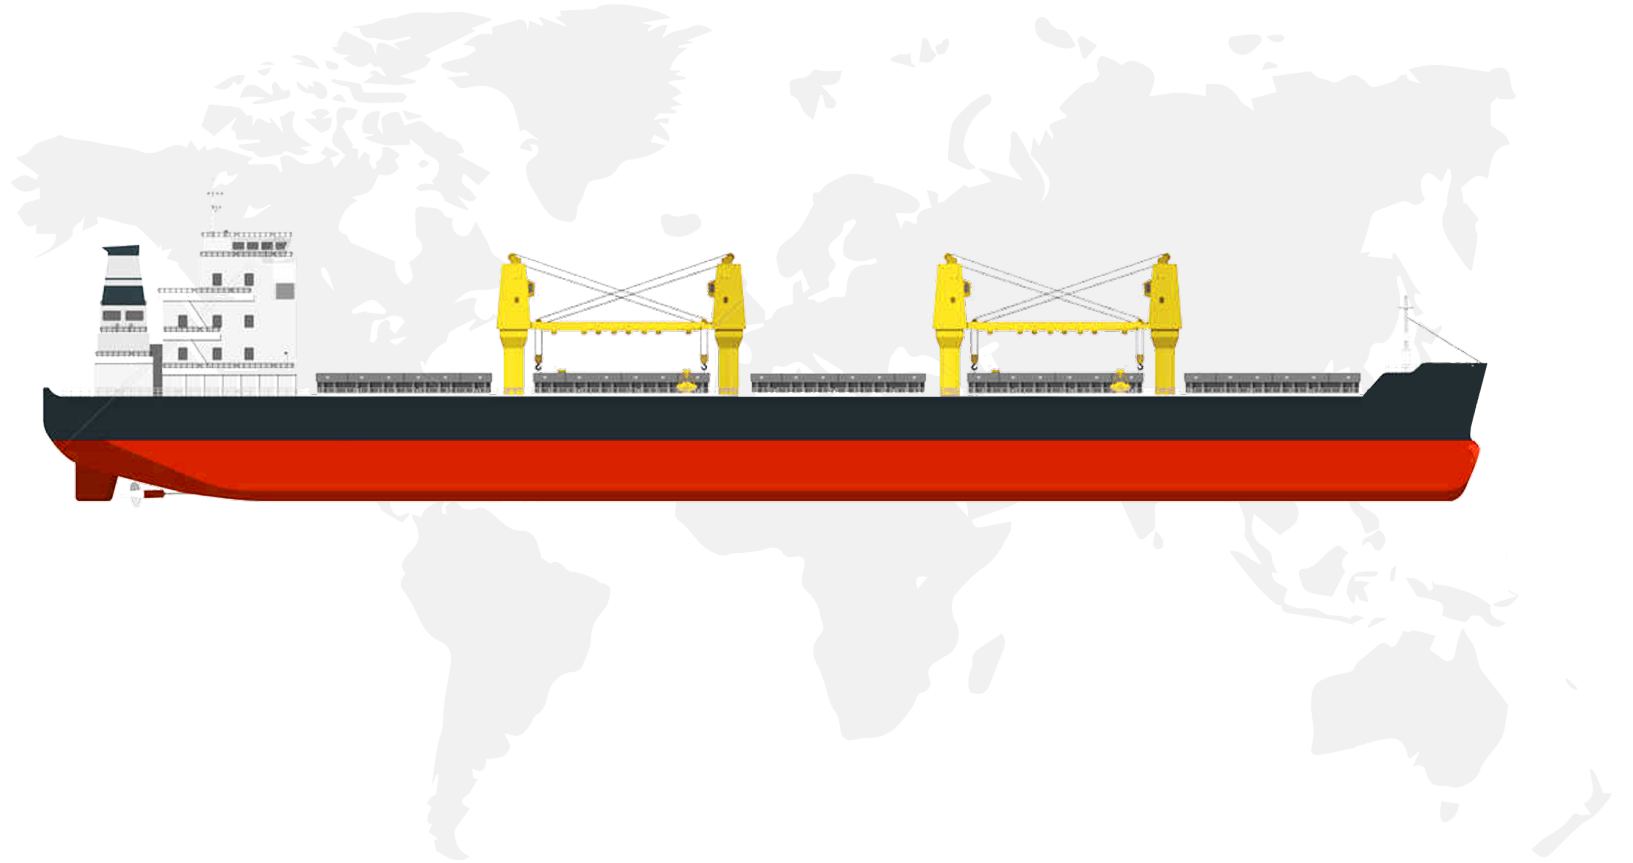

Trains can carry heavier goods than road transport, less affected by weather conditions, there are no seasonal restrictions when transporting goods over long distances, railway transport will win in transportation tariffs especially to the direction of Siberia and the Far East from central Russia and vice versa. Our company provides transportation services in covered wagons, refrigerated sections, semi-wagons, and containers (dry and refrigerated), in international traffic from China to Russia in container trains. We have accreditation in Russian Railways.

Sea freight

This mode of transportation is mainly used internationally over long distances, if the client is not sensitive about the delivery time, and if the minimum cost is required

Our company offers shipping services by sea using containers from China, Vietnam, Iran, and Europe to the Russian Federation.

Air freight

This mode of transportation is the most expensive and, usually, used when express delivery is required.

Our company cooperates with leading airlines (S7, AirBridgeCargo, Aeroflot, Korean Air, China Airlines, etc.) and offers delivery services by air transport in Russian Federation, and internationally: China, Vietnam, South Korea, and Europe.

Warehouse services

Our company provides warehousing services in **Russia, China and Europe**

Distribution warehouse in Moscow

Project logistics

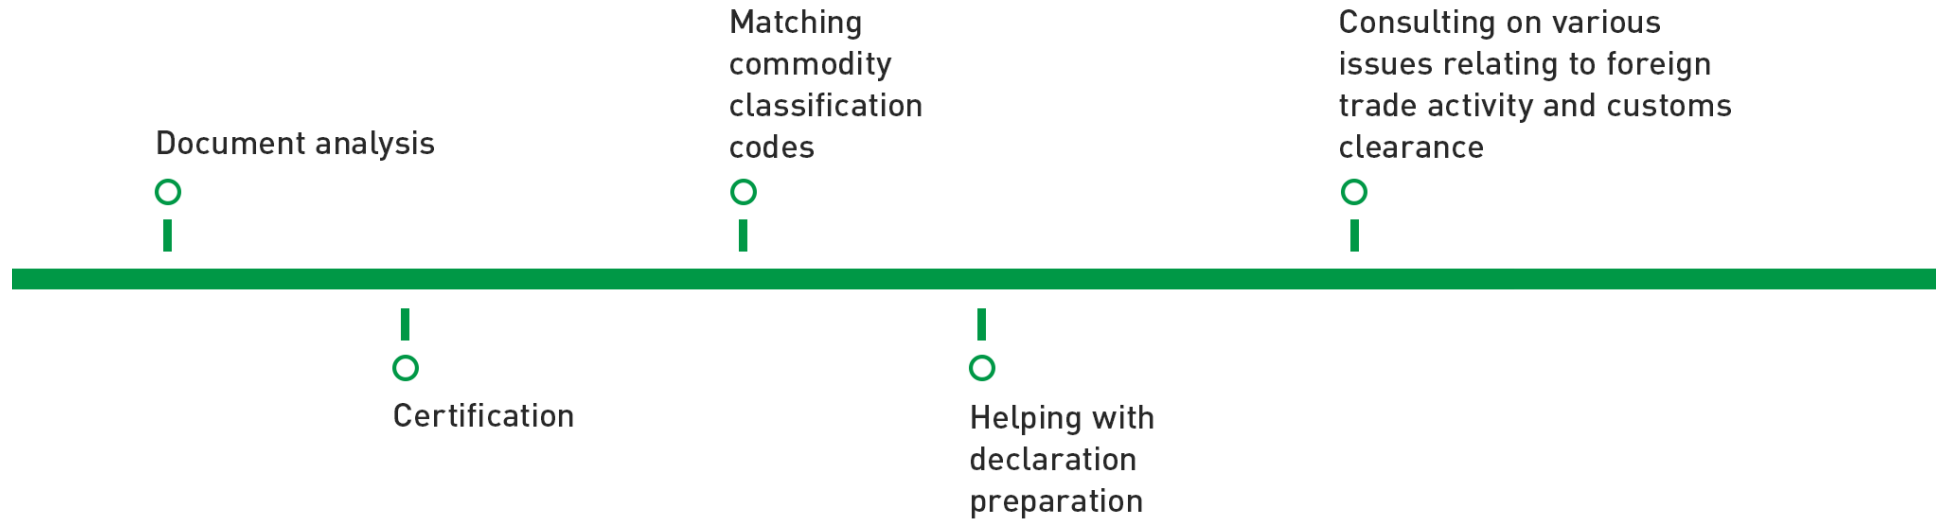

Project logistics is logistics, which requires an individual approach and a set of measures to solve the problems of freight delivery.

Our company has experience in organizing deliveries of non-standard goods, delivering goods to hard- to-reach places **(Yakutia, Yamal, northern Sakhalin, etc.)**, organizing the supply chains of trading enterprises. If you are faced with difficult tasks, we will be happy to help you.

Individual approach

Customs clearance

Freight insurance

We can provide insurance for our shipments at the leading insurance companies like Ingosstrakh, Absolute Insurance, Alliance Insurance, TTC, and Soglasie.

Many years of experience, established contacts with insurance companies, will allow you to be calm for your shipment.
